- View raw, filtered, or selected Orphan Well Data
- Can filter data by map extent
- Can expand table by grabbing top of table (just below the arrow button) and pulling up
- Table updates as you filter data

FILTER ORPHAN WELL DATA:

- Select first which state you would like to filter by
- Select additional pre-set filters to narrow down your search
- Additional tools are available by clicking the three dots in the bottom-right corner
- Filters compound on each other. For example, if you choose Orphan Wells within 1 Mile of Water and Orphan Wells within 1 Mile of Public School, the resulting data will show wells present in both areas.
- Turning off all filters will reset the extent of the map
- Create a custom filter to show unique datasets. For more information on creating custom filters, click [here](#).
